

## Reports

Track your financial and database information in nearly any combination that you can imagine. Reports can be printed by day, week, month, year, or any collection of sequential days you wish.

Track your employee earnings from Monday through Wednesday, then Thursday through Saturday. Track one product's use through an entire year. Print a list of every client and patient who received a particular [inventory](#) item when there's an emergency recall. Find out what products bring in the most [money](#). Export your reports to PDF files so that you can take them home and review them at your leisure. Reports can also be exported to Excel or any other program that allows for standard formatted data to be imported.

Infinity's Reports Module gives you easy access to all of your information and lets you print it out at any time for any date range.
